

## TWIZZLE

*Twizzle* is the first Dubois-designed sailing superyacht to be built at the Royal Huisman Shipyard and at 57.5m, she is the largest Dubois-designed ketch built to date.

*Twizzle* is a shallow draft centreboard yacht. A large and powerful ketch rig, together with sleek flowing hull lines and her super-efficient centreboard give *Twizzle* great performance under sail. The sail area to weight ratio has been boosted with a large mizzen sail and we expect this yacht, which has capacious accommodation, to sail well in all conditions.

In close collaboration with Redman Whiteley Dixon, who were the interior and exterior stylists, and Todhunter Earle who were the interior designers, we developed the hull and deck layout, sail plan, naval architecture, aluminium structure and propulsion layout into a perfectly integrated package.

*Twizzle*'s beautifully proportioned, contemporary and uncluttered teak deck conceals the secrets of her advanced technology, complimenting *Twizzle*'s clean and modern appearance.

*Twizzle* is the very successful result of the owners' vision for a high performance, high-tech and modern sailing yacht with all the comfort of a motor yacht. The owners have been central to this talented team, bringing their own ideas and significant experience to the process, adding challenge and momentum.

*Twizzle*'s 'green' credentials are particularly commendable. She is certified to the highest standards for operation in the world's most sensitive marine environments, including Alaska, and is fully carbon neutral both in build and in operation.
